Update No. 13

General	Rainfall was scattered this past week with some fields receiving very good amounts while Ashley received none. Bollworms are building in fields, especially those that were later planted and have not lapped the middles. Both Ashley and Drew 2 were treated for bollworms this past week. Stink bugs are beginning to build in Chicot but others have very few. Refer to information in table for field specifics.		
County	Variety	Stage	General Information
Arkansas	Pioneer 49T80R	R2	Received .5" rain. Second irrigation applied 7-3-16. Should receive third irrigation 7-12-16. Blooming very well. Insect and disease free.
Ashley	Asgrow 4835 RR/STS	R3	Second irrigation applied 7-5-16. Should receive third irrigation 7-11-16. Very close to canopy. Bollworms running 7/25 sweeps, recommended 2 oz. Belt or 17 oz. Prevathon + 1% MSO. Disease free.
Chicot	Asgrow 4632 RR/STS	R5	Received .2" rain. Should receive second irrigation over the weekend. Continues to be very impressive looking field. Stink bugs running 6/25 sweeps, will re-evaluate again next week. Disease free.
Desha	Asgrow 4632 RR/STS	R5	Received 2.5" rain. Third irrigation applied 7-2-16. Should receive fourth irrigation 7-12-16. Looks great. Insect and disease free.
Drew 1	Pioneer 47T36R	R4	Received 1.87" rain, relieved drought stress symptoms a little. Still need more rain. Running 5.88" moisture deficit. Insect and disease free.
Drew 2	Asgrow 4632 RR/STS	R2	Received 2.1" rain. Should receive second irrigation 7-13-16. Treatment threshold bollworms, recommended 2 oz. Belt. Disease free.
Jefferson	Stine 42LH22	R5	Received .45" rain. Fifth irrigation applied on 7-4-16. Continues to look impressive. Next irrigation on 7-11-16 if no rain. Insect and disease free.
Lee	UA 5814 HP	V12	Received .6" rain. Should receive second irrigation over the weekend. Some evidence of dicamba drift showing up. Remains clean.
Lincoln	Asgrow 4632 RR/STS	R5	Received 1" rain. Fifth irrigation applied 7-3-16. Next irrigation 7-12-16 if no rain. Still very good looking field. Many more pods set over the past week. Insect and disease free.
Lonoke	Stine 51LE20	R1	Received .1" rain. 1 qt. Prefix applied 7-1-16 just ahead of initial irrigation. Should receive second irrigation 7-11-16. Very good growth over the past week.
Monroe 1	UA 5213C	V9	Received 1.1" rain. 1.5 pt. Flexstar applied 7-1-16 just ahead of rain. Cleaned up morning glories.
Monroe 2	Pioneer 50P40	V3	Received 1.4" rain. Glyphosate + Dual applied before rain.
Phillips 1	Hutcheson	V11	Received 2" rain. Should receive initial irrigation 7-13-16. Low levels of armyworms.
Phillips 2	Pioneer 47T36R	R3	Received 2.5" rain. Second irrigation 7-13-16 if no rain. Stink bugs running 2/100 sweeps. Disease free.
Prairie	Asgrow 4632 RR/STS	R3	Received .1" rain. Second irrigation delayed due to well problems. Should be irrigated as soon as fixed. Field looks very good. Insect and disease free.
